

# Bluestem

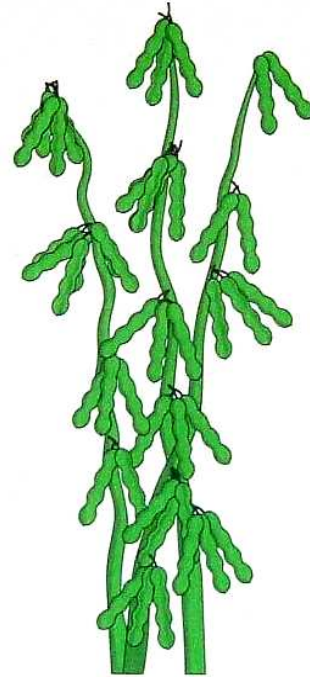

0906N

Maturity: 0.9

**DESCRIPTION:** 0906N is a conventional, medium-tall height, mid to late Group 0 soybean having extremely high yield potential. The grain produced from this soybean has an exceptionally high protein and oil content.

**STRENGTHS:** This variety has early emergence and fast growth, making it well suited for organic and other growers seeking fast canopy. Defensive traits are its excellent IDC scores and its Rps1k resistance to Phytophthora Root Rot.

**MANAGEMENT:** Suitable for use in high pH soils. Is resistant to Soybean Cyst Nematode.

<b>Plant Characteristics</b>		<b>Disease and Pest Response</b>	
Plant Height:	Medium	Phytophthora Tolerance:	7
Plant Type:	Medium-Bushy	Phytophthora Race Resistance:	Rps1k
Emergence:	9	Brown Stem Rot:	N/A
Pubescence:	Tawny	Cyst Nematode Resistance:	Resistant
Shattering:	8	Iron Chlorosis:	9
STD:	8	White Mold Tolerance:	7
Flower Color:	Purple	Sudden Death Syndrome:	N/A
Hilum:	Black		
Pod Color:	Tan		
Seed Count:	2200		

9=Excellent, 1=Poor, N/A= Not Available
