

# LGS1635RX

1.6 RM

## PRODUCT INFORMATION

LGS1635RX is a key product for the mid Group 1 maturity due to its outstanding yield performance while offering excellent standability and white mold tolerance. This variety has very good IDC tolerance and exhibits good stress tolerance.

- Top-end yield potential for the northern corn belt.
- Great option for growers concerned about White Mold.
- Brown Stem Rot resistance and good IDC scores.
- Strong performance north and south of its adapted zone.

## MANAGEMENT TIPS

Very good adaptability into no-till and minimum tillage environments in all common row spacings. Can be positioned on most soybean acres across SD, MN, WI, MI, and into northern IA and NE where maturity is appropriate. Height is maintained under stress and on lighter soil.

## PLANT CHARACTERISTICS

	1	2	3	4	5	6	7	8	9
Emergence	█	█	█	█	█	█	█	█	█
Standability	█	█	█	█	█	█	█	█	█
Shatter Resistance	█	█	█	█	█	█	█	█	█
Plant Height .....									M
Plant Type .....									M
Pubescence .....									Lt. Tawny
Flower Color .....									Purple
Hilum .....									Black
Pod Color .....									Brown

GDUs are estimates based on observations and are to provide guidelines for area adaptation. Performance may vary from location to location and from year to year, as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible and should consider the impacts of these conditions on the grower's fields. Preferred Placement Zones represent the best areas of adaptation for a product based on in-field observations, genetic background, and trial data. Products may fit within only a portion of a zone, and products may perform well in other areas not identified. Contact your sales team for details.
